

Important Update Regarding Canine Influenza Vaccinations

Dear Valued Clients,

We have received notification from our suppliers that the canine influenza vaccine is currently on backorder. We understand that this may cause inconvenience and worry for you, especially if your dog is due for their vaccine or if they are at a high risk of exposure.

Please rest assured that we are working diligently to find an alternative source for this vaccine, and we will update you as soon as we receive more information on its availability. We recommend that you speak with your veterinarian about the best course of action for your dog during this time.

In the meantime, we recommend that you continue to take the necessary precautions to ensure the health and safety of your pet. This includes washing your hands and your pet's paws after visiting places frequented by other animals, remaining aware of any contact with other animals your pet may encounter, and keeping your pet up to date on other core vaccinations.

Thank you for your patience and understanding. We look forward to providing you with the canine influenza vaccine as soon as it is available!

Kind Regards,

Your Veterinary Team at Mountainside
